

## General Information Practical Course in Basic Preparative Organic Techniques

For students of „Master of Chemistry“

For registration, and to receive current information and dates, please visit:

**<https://www.tu-braunschweig.de/flw/studierende/chemie/praktika>.**

Introductory events usually take place at the beginning of the semester on the first tuesday in the winter term, the first wednesday for the summer term respectively. For continuously updated information, please see postings on the bulletin board.

The attendance for the introductional lecture, safety briefing, fire extinction unit and complete introductional course is **compulsory!**

**If one event is missed, the course cannot be finished, and you will be excluded from the running course for the current semester!**

- Course dates are Mon/Tue/Wed for the winter term, Mon/Wed/Thu for summer term.
- The practical course will take place in the Laboratory Halls 214 and 216
- Taking-over of the laboratory place will be carried out after the introductional lecture.
- The course starts with a compulsory two-week introductional course

**The security deposit for the laboratory place will be 20,- €, and 10,- € for a locker. Please have the money with you when taking over the lab place!**

Updated information are presented at the bulletin board on the ground-floor of the chemistry building, Hagenring 30, as well as on the information board in front of the laboratory halls.
